PROFESSIONAL SUMMARY

- 3 years of relevant experience in .NET and dotnet core technologies.
- Good in dotnet Core, Azure, asp.net core, asp.net core mvc, ADO.NET, Entity Framework, NET Framework 4.5+, JavaScript, jQuery, Ajax, Design Patterns and SOLID Principles.
- Worked upon custom programming language internally used in Simplify Healthcare and Document generation logic. Implemented the Word and PDF document related functionalities to manipulate the document text.
- Learning and Implementing standard methodologies like SOLID principles and Design Patterns for better coding standards.
- Good Communication skills and the ability to work efficiently with quick learning also working with new technologies to fulfill project needs.

PROFESSIONAL EXPERIENCE

1) Simplify Healthcare/ Ognam Technologies, Pune

Currently Working as a Software Engineer in Simplify Healthcare/ Ognam Technologies since 11 May 2021.

1.Project Title: eBenefitSync

Technologies

- **Technologies:** C#, .NET, Azure, Entity Framework, ADO.NET, Azure Message Queue.
- **Database** : SQL Server

Description

eBenefitSync is a software product developed and maintained by Simplify Healthcare. This product is developed for the US Healthcare Insurance Payers companies. To reduce the manual efforts for maintaining the documentation and Health Plans Data for the Individual customers or Group Customers. While working on the product did various User Stories implementations with custom programming language called "expression rule". Did different Performance optimization and code enhancements in the product. As a maintenance work handled different code fixing for critical issues. Handled Important Technical discussion to for Data and environment migration activity.

2.Project Title: eMedicareSync

Technologies

- **Technologies** : C#, .NET Framework 4.8, Entity Framework, ADO.NET
- **Database** : SQL Server

Description

eMedicareSync is a ASP.NET MVC based web application platform whose main objective is to reduce the manual efforts for maintaining the documentation and Health Plans Data for the Individual customers or Group Customers. While working on the project I have developed full stack sub-modules for template data upload download functionality. Worked on Document generation (Word and PDF) core logic to handle the important table generation.
